EDUCATION

B.Tech in Electronics And Communication

SRM Institute of Science and Technology

CGPA: 9.3

September 2021 – June 2025

SKILLS

Languages

Python, JavaScript, TypeScript, Solidity, C++, ALP, VHDL, SQL

Web Technologies

HTML, CSS, ReactJS, Web3, Framer-Motion, Redux, GraphQL, Next.js, Express

Tools & Platforms

Zustand, TanStack Query, Tailwind CSS, REST APIs, CDN, Git, DePIN, ENS

EXPERIENCE

Software Developer

April 2025 – June 2026

Covalent

Remote

- Engineered a mobile-first prediction market using **Next.js** and **Hono**, scaling to **600+ active traders**; architected a high-performance **REST API** and embedded the **Polymarket SDK** to enable real-time market data.
- Developed a full-stack **multi-chain trading terminal** across **Solana** and **Hyperliquid**, leveraging **Zustand** and **TanStack Query** to optimize state management and **improve rendering performance by 35%**; integrated **Turnkey** embedded wallets.
- Architected core trading logic for **Meteora AMM** and **Pumpfun AMM**, increasing trading throughput by **25%** while decreasing **transaction landing time** for better experience.

Frontend Developer

January 2025 – April 2025

Atmos Protocol

Remote

- Spearheaded delivery of a production-ready UI for a gamified **DEX** on the **Supra L1** chain using **Next.js** and **Tailwind CSS**, liaising with designers to translate specs into pixel-perfect components.
- Streamlined **REST APIs** and **GraphQL** queries for real-time data flow, accelerated delivery via **CDN**, and deployed skeleton loaders – reducing page load time by **45%**.
- Shipped frontend swap functionality using **React Context** and wired **Starkey Wallet** for secure **Supra L1** transactions, communicating trade-offs with the product team to prioritize UX improvements.

Frontend Developer

August 2024 – December 2024

Positions Fi

Remote

- Spearheaded **React.js UI/UX** enhancements for a **DeFi** lending protocol, increasing user satisfaction by **25%** and reducing load times by **30%**.
- Directed rapid prototyping and agile feedback cycles, ensuring strong stakeholder alignment and reducing pre-release revision cycles by **40%**.

PROJECTS

Flux ([GitHub](#))

- Designed a **Web3-native, AI-powered** support platform using **Next.js**, **TypeScript**, and **Python**, integrating **ASI-nuAgents**, **MeTTa** reasoning, and **RAG** to automate on-chain actions and improve query resolution accuracy by **18%**.

APY-LO ([GitHub](#))

- Constructed a responsive **DeFi** dashboard using **Next.js**, **TypeScript**, and **Tailwind CSS**; wired **REST** and **GraphQL APIs** for real-time **APY** tracking, wallet connectivity, and seamless **ERC-20** staking and borrowing flows.

AWARDS

- Secured **Third Place** at **ETHGlobal Delhi 2025** for Fluence, competing against 200+ teams.
- Awarded **First Place** at **ETHIndia 2024** for Lit Protocol and Supra, selected from 500+ participants.
- Achieved **First Place** at **Unfold 2024** for Agoric and **Second Place** at **Superhack** for Celo Protocol.
